PROFESSIONAL SUMMARY

Test Automation Engineer with 5+ years of experience in QA automation across web, API, and backend systems, with hands-on expertise in Python, Playwright, Pytest, Selenium, Cypress, accessibility testing, and CI/CD. Built automation covering 40 countries and contributed 600+ tests to a 2,700+ test enterprise regression suite, while also supporting Django and Django REST Framework-based systems.

PROFESSIONAL EXPERIENCE

QA Automation Engineer - Thomson Reuters

Apr 2022 - Present

Remote

- Co-designed a Python/Playwright/Pytest geolocation automation framework with BrowserStack, Jenkins, GitHub Actions, and Allure Reporting to validate localized experiences across 40 countries.
- Built and maintained 250+ automated tests and contributed 600+ tests to a 2,700+ test enterprise regression suite, expanding coverage across Reuters.com customer journeys.
- Automated production-critical checks for short-form video, user account journeys, subscriptions, and OneTrust consent workflows.
- Implemented accessibility automation with Axe and integrated WCAG validation into CI/CD pipelines.
- Implemented Datadog Synthetic Monitoring and grouped tests by similar functionality to reduce execution cost while preserving functional coverage.
- Reviewed automation code and helped shape framework architecture, testing strategy, and QA decisions within a four-engineer team.

Software Engineer - TASDEEQ

Oct 2021 - Apr 2022

Lahore, Pakistan

- Developed automated functional and regression tests for backend services and customer-facing workflows, supporting a mobile application that surpassed 1 million downloads.
- Designed, implemented, and maintained 50+ REST APIs in Django and Django REST Framework for OTP authentication, reporting services, and voucher management.
- Wrote Django unit tests that achieved approximately 60% backend code coverage and used JMeter for API performance testing under load.
- Collaborated with product and engineering teams on requirement analysis, testability, reliability, and deployment readiness.

Software Engineer - TechLeadz

Aug 2020 - Sep 2021

Lahore, Pakistan

- Performed functional testing and developed automated checks for web and mobile applications, documenting defects and coordinating fixes with developers.
- Automated SharePoint site-provisioning workflows across 35+ sites, reducing creation time by 30%.
- Developed Python automation integrating HubSpot, Indeed, Google Jobs, LinkedIn, and Hunter.io, and built data pipelines using Amazon SES and ActiveCampaign APIs.
- Developed and maintained Django and Django REST Framework applications and supported deployments on AWS EC2.
- Mentored a newly hired engineer for two months to support onboarding and technical development.

TECHNICAL SKILLS

Automation: Playwright, Pytest, Selenium, Cypress, Postman, Axe, Page Object Model

Testing Types: QA Automation, Test Automation, API Testing, Functional Testing, Regression Testing, Integration Testing, Accessibility Testing, Performance Testing, Cross-Browser Testing

CI/CD & DevOps: Jenkins, GitHub Actions, Docker, Git, Allure Reporting, BrowserStack

Monitoring & Performance: Datadog Synthetic Monitoring, JMeter

Programming: Python, JavaScript, SQL

Backend: Django, Django REST Framework

EDUCATION

Bachelor of Science in Computer Science - National University of Computer and Emerging Sciences, Pakistan

Aug 2016 - Aug 2020

CERTIFICATIONS

- API Test Automation with Postman - Test Automation University
- Introduction to Pytest - Applitools
- Introduction to Cypress - Test Automation University
- Intermediate Regression Test Writing - SecureFlag
