PROFESSIONAL SUMMARY

SDET and QA Automation Engineer with 6+ years of experience designing and maintaining scalable test automation for web, API, and backend systems. Strong expertise in Python, Playwright, Pytest, Selenium, Cypress, cross-browser testing, accessibility, and CI/CD. Co-designed a geolocation automation framework covering 40+ countries and contributed 450+ tests to a 1,200+ test enterprise regression suite. Backend development experience with Django and Django REST Framework supports effective system-level testing and close collaboration with engineering teams.

PROFESSIONAL EXPERIENCE

QA Automation Engineer - Thomson Reuters

Apr 2022 - Present

Remote | Global provider of trusted news, information, and analytics

- Co-designed a Python, Playwright, and Pytest geolocation automation framework with BrowserStack, Jenkins, GitHub Actions, and Allure Reporting to validate localized experiences across 40+ countries.
- Built and maintained 250+ automated geolocation tests covering localized content and user journeys across Chrome, Safari, and mobile environments.
- Expanded Reuters.com coverage by automating high-value customer journeys and contributing 450+ tests to a 1,200+ test enterprise regression suite.
- Automated production-critical flows for short-form video, user account journeys, subscriptions, and OneTrust consent behavior.
- Integrated Axe accessibility checks into CI/CD pipelines to detect WCAG issues during continuous testing.
- Implemented Datadog Synthetic Monitoring for production-critical flows and reduced execution cost by grouping similar tests while preserving coverage.
- Reviewed automation code and contributed to framework architecture, testing strategy, and quality decisions within a four-engineer QA team.

Software Engineer - TASDEEQ

Oct 2021 - Apr 2022

Lahore, Pakistan | Licensed credit bureau and financial technology company

- Co-architected backend services in Django and Django REST Framework, designing and maintaining 50+ REST APIs for OTP authentication, reporting, and voucher management.
- Designed and implemented the Tasdeeq mobile app's core credit report fetching functionality, covering the complete report flow end to end.
- Developed automated functional and regression tests for backend services and customer-facing workflows on a mobile application that surpassed 1 million downloads.
- Wrote Django unit tests covering approximately 85% of the backend codebase.
- Performed JMeter performance testing on backend APIs including credit report fetching, OTP, user sign-in, sign-up, and profile updates.
- Collaborated with product and engineering teams on requirement analysis, testability, backend reliability, and deployment readiness.

Software Engineer - TechLeadz

Aug 2020 - Sep 2021

Lahore, Pakistan | IT solutions and technology consulting company

- Performed functional testing and developed automated checks for web and mobile applications, documenting defects and coordinating fixes with developers.
- Automated SharePoint site-provisioning workflows across 35+ sites, reducing creation time by 30%.
- Developed Python automation integrating HubSpot, Indeed, Google Jobs, LinkedIn, and Hunter.io to streamline lead generation and outreach.
- Built data pipelines that collected, transformed, and analyzed marketing data from Amazon SES and ActiveCampaign APIs.
- Developed and maintained Django and Django REST Framework applications and supported deployments on AWS EC2.
- Mentored a newly hired engineer for two months, supporting onboarding and technical development.

TECHNICAL SKILLS

Automation: Playwright, Pytest, Selenium, Cypress, Postman, Axe, Page Object Model

Testing: UI, API, integration, regression, accessibility, performance, cross-browser, mobile web

CI/CD & Infrastructure: Jenkins, GitHub Actions, Docker, Git, BrowserStack, Allure Reporting

Monitoring & Performance: Datadog Synthetic Monitoring, JMeter

Programming: Python, JavaScript, SQL

Backend: Django, Django REST Framework

EDUCATION

Bachelor of Science in Computer Science - National University of Computer and Emerging Sciences, Pakistan

Aug 2016 - Aug 2020

CERTIFICATIONS

- API Test Automation with Postman - Test Automation University
- Introduction to Pytest - AppliTools
- Introduction to Cypress - Test Automation University
- Intermediate Regression Test Writing - SecureFlag
